

Website pre-publish checklist

KGC 2027 / apps/web / September 2026

Run `npm run publish:web`. It deploys to staging at `staging.knowledgegraph.tech` and runs these checks against it. Everything below is automatic except the last section.

Before deploying

- ☐ Your latest commit is pushed to GitHub
- ☐ No other deploy running on the server
- ☐ Web app typechecks
- ☐ Unit tests pass
- ☐ Staging is running the commit you pushed

Tickets page

- ☐ Opens on the tickets, first price visible without scrolling
- ☐ Dates and venue under the heading
- ☐ At least one ticket on sale
- ☐ Every ticket has a name and a real price
- ☐ Most expensive ticket is the big panel
- ☐ Sold out or closed tickets say why
- ☐ Every Choose button opens checkout with that ticket picked
- ☐ FAQ answers open
- ☐ Invoice link and contact email work
- ☐ Cancelled payment message shows

Checkout

- ☐ Right ticket name and price for every tier
- ☐ Order summary, total and pay button all show the same amount
- ☐ Change and All tickets go back
- ☐ Unknown ticket in the link shows a picker instead
- ☐ Quantity goes 1 to 10
- ☐ Each extra ticket adds an attendee card
- ☐ Total updates with quantity
- ☐ Mixed tickets add up correctly

- ☐ Typed names survive changing the quantity
- ☐ Every field has a label, name and email are required
- ☐ No price or card fields on the page
- ☐ Code of conduct and privacy links work
- ☐ Can be filled in with the keyboard only
- ☐ Fits a phone with three attendees, pay button easy to tap
- ☐ Demo skip payment button never shows on the real site

Sales state

Flip PREPUBLISH_SALES to open in scripts/publish-web.sh when Stripe goes live.

- ☐ Closed: pay button is greyed out
- ☐ Closed: notice with an Email us link
- ☐ Open: pay button works
- ☐ Setting matches reality (PREPUBLISH_SALES)

When sales are open

- ☐ Blank name refused
- ☐ Bad email refused, typing kept
- ☐ Same email twice refused
- ☐ Extra attendee with no name refused
- ☐ Made up ticket type refused
- ☐ Stripe page shows the right ticket, amount and email
- ☐ Optional: test card purchase lands on the order page

Invoice, sponsor and exhibitor

- ☐ Invoice page says closed and offers email, or shows the form
- ☐ Invoice attendees add and remove, subtotal follows, max ten
- ☐ Invoice refuses missing company, bad billing email, duplicates
- ☐ Sponsor and exhibitor packages show prices or say not published
- ☐ Choosing a package fills the form below

Security

- ☐ Fake Stripe payment notification refused
- ☐ Return page with a fake session gives no ticket

- ☐ Fake links to order, speaker, reviewer and exhibitor pages return not found
- ☐ Exhibitor leads download never leaks a spreadsheet
- ☐ Local-only sign-in code reader is off
- ☐ HTTPS headers present
- ☐ No keys or passwords in the page code

Penetration testing

Safe to run on the live site. No data written, no emails, no load testing.

- ☐ Private files not served: .env, .git, package.json, config files
- ☐ Path traversal refused
- ☐ Source maps not published, folders don't list their files
- ☐ Script in search, links or the checkout form never runs
- ☐ Injection attempts and very long input don't break search or checkout
- ☐ Forged server action refused, no stack trace
- ☐ Error pages don't show code or file paths
- ☐ Unusual HTTP methods handled, TRACE doesn't echo
- ☐ Sign-in endpoints reject requests from other websites
- ☐ Guessed or malformed sign-in codes refused, no token returned
- ☐ No redirects to outside websites
- ☐ HTTP upgrades to HTTPS
- ☐ Purchase pages can't be embedded in another site
- ☐ Server doesn't advertise what it runs on
- ☐ Cookies are Secure

Every page, desktop and phone

- ☐ Loads in under 8 seconds
- ☐ Has a title, a main heading and a description
- ☐ Header and footer present
- ☐ No undefined, NaN, TODO or placeholder text
- ☐ No old or local web addresses
- ☐ All images load and have alt text
- ☐ No console errors or failed requests
- ☐ No sideways scrolling on a phone

- ☐ 404 page works

Navigation and sharing

- ☐ Header and footer links work
- ☐ Phone menu opens and closes
- ☐ Search finds results
- ☐ No broken links anywhere on the site
- ☐ Accessibility scan passes
- ☐ Link previews have a title, description and working image
- ☐ Page titles are all different

By hand, before the first real sale

These can't be automated yet.

- ☐ Buy one ticket on staging with the Stripe test card
- ☐ Receipt email arrives
- ☐ Sign into the app with that email and see the badge
- ☐ Order shows on the dashboard with the right amount
- ☐ Refund it from the dashboard
- ☐ Promo code gives a discount
- ☐ Tax shows for a New York address

Last full run: staging, 25 September 2026, commit 59a31d0. All automatic checks passed; the sales-open checks were skipped because Stripe is not set up.
